MANUFACTURED

HOMES

MEDALLION

Series

by **MILLER**

Exclusively made for your Manufactured Home.

While there are many choices when considering air conditioners, few are designed and tested specifically for use in manufactured homes.

The Medallion Series by Miller, 13 SEER split system air conditioner, offers maximum efficiency and system dependability for your manufactured home.

The more you learn about our manufacturing process, the more you'll see that no other heating and cooling manufacturer compares to Miller's product quality — quality made possible through Demand Flow Technology™. While other companies test products at random, we use 100% computer-automated testing on every Miller product to eliminate human error in the final analysis of product quality. We are the only heating and cooling manufacturer to be DFT certified.

Miller is a household name in the manufactured housing industry, with over 75 years of experience. Given our history and dedication to the manufactured housing industry, it is easy to see why most new manufactured homes are built with our heating systems, and when applicable, are equipped with our cooling systems too. You can rely on your Miller expert to make your home more comfortable with AireCare electronic air filters, digital thermostats and other manufactured home accessories.

It's a comfort to know that the Medallion Series by Miller is made for your manufactured home, and it's a comfort you can feel.
