ADVANCED TECHNOLOGY

BROAN furnaces feature iSEER technology that increases the energy efficiency of your outdoor air conditioner or heat pump during the cooling season. Cooling performance is measured in terms of SEER (Seasonal Energy Efficiency Ratio). The higher the SEER, the more energy efficient the cooling system performs. BROAN furnaces featuring iSEER increase that performance by 1 SEER. Ask your dealer about BROAN's line of energy efficient outdoor products.

iSEER™

On gas units, the SmartLite® Control Board learns the igniter's heat-up characteristics. It then adapts the ignition time to the furnace's characteristics, resulting in extending the life of the igniter.

DURABILITY AND STYLE

These models feature precoated steel doors for superior quality and durability. Broan furnaces are also small in size, making them ideal for tight spaces.

QUIET COMFORT

The unique burner design and the insulated blower cabinet provide clean and quiet operation.

PEACE OF MIND

Broan products feature a 10-year limited warranty on parts. Plus, our Quality Pledge states that your entire furnace will be replaced if the heat exchanger fails within the first 10 years of ownership.

ENERGY EFFICIENCY

Broan furnaces are rated in Annual Fuel Utilization Efficiency (AFUE) units. A higher AFUE rating makes it easier for your system to perform more efficiently by delivering more heat to your home and lowering your utility bills. You can be sure in the total comfort of your home that Broan furnaces will save you more.

Three-year heating savings of compared units - dollar amounts computed at \$.092 ccf, for 2,500 full-load heating hours and a system rated at 60,000 Btuh. Actual savings vary depending on climate conditions, fuel rates, and patterns of usage according to individual lifestyle.
