PROVIDING COMFORT, QUALITY AND WORRY-FREE PERFORMANCE

M1200 Air Conditioner/Heat Pump and Gas Furnace System with iQ Drive[®] Technology to 23 SEER

M1200 Air Conditioner/Heat Pump and Gas Furnace System with iQ Drive[®] Technology up to 23 SEER

The Maytag iQ Drive Complete-Comfort System is quite simply the smartest comfort system available. It's the only system that not only controls temperature, but also achieves the most consistent levels of humidity, air quality and ventilation. And all at the lowest sound levels in the industry.

The Maytag iQ Drive Complete-Comfort System Delivers Total Indoor Air Quality

The Maytag iQ Drive Complete-Comfort System circulates air throughout your home by mixing air from floor to ceiling. Its variable-speed technology creates more uniform temperatures, improved air filtration and reduced humidity levels. You can set dehumidification between 35% and 70% and the iQ Drive System will work to remove the humidity from your home and keep it at the desired level. For true humidity control, you can add a dehumidifier or a whole-home humidifier. Ask your Maytag dealer for details.

To take total control of your indoor air quality, you can program the iQ Drive thermostat to notify you when it is time to change your filter. Having a clean filter is key to circulating healthier indoor air. If you have allergies and need to remove dust, smoke or other airborne particles, Maytag also offers numerous wholehome indoor air quality products designed to work with the iQ Drive Comfort System.

Comfort When You Need It

The iQ Drive System can be easily programmed to your schedule, saving energy when you're not home. You can program a 7-day comfort schedule to control up to four specific events at precise times of the day such as wake-up time, work time, home arrival or sleep time. You can even set a vacation mode for ultimate energy efficiency while you're away.

Smart, Dependable Comfort

The Maytag iQ Drive® System utilizes inverter rotary technology to achieve the highest efficiency level available today. The inverter board is the brain of the system, while the rotary compressor is its heart. By communicating together, they can condition the air perfectly at all times while using the least amount of energy.

Should a performance error occur, the iQ Drive thermostat will report on-screen that a fault has been detected. This allows the Maytag dealer to quickly diagnose the cause of the error, making service quick and easy.

A key to longevity of any cooling or heating system is proper maintenance. With the iQ Drive thermostat, you can ask the dealer to preprogram maintenance reminders for indoor air-quality accessories that you decide to add to your system. A home comfort system is an investment to ensure that your family is comfortable for years to come.

Heat Pump or Air Conditioner?

The 23 SEER iQ Drive air conditioner is an excellent choice for geographies where maximum cooling efficiency is needed. In areas where heating efficiency is also desired, consider the 20 SEER heat pump. It operates in the summer the same as an air conditioner, but also provides heat in the winter. And with an HSPF (Heating Season Performance Factor) up to 10.0, it's incredibly efficient no matter what the weather.

Maytag iQ Drive[®] System for Dependable Total Home Comfort

Annual costs based on 36,000 Btu unit, 1,500 cooling load hours and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

Seasonal Energy Efficiency Ratio (SEER) is the unit by which all air conditioning and heat pump energy efficiency is measured. In the world of cooling, the higher the SEER, the better the efficiency and the lower your power bills. While most homes built in the last 10 years have 8 to 10 SEER air conditioners, Maytag has raised the bar to 23 SEER, the highest efficiency level yet in air conditioning, and 20 SEER, the highest efficiency level for an air-source heat pump. Just a few of the many benefits include:

- Lower energy bills
- Better dehumidification
- Reduced hot and cold spots
- The lowest sound levels ever

The indoor section includes the iQ Drive gas furnace/coil components. The efficiency of a gas furnace is measured in AFUE (Annual Fuel Utilization Efficiency). The higher the rating, the more efficient the product. This section is available in 80% AFUE through 97+% AFUE efficiencies. Your Maytag dealer can recommend the efficiency level based on your needs.

So Smart, iQ Delivers the Highest Energy Efficiency

The Maytag iQ Drive System utilizes inverter rotary technology to achieve the highest efficiency level available today.

Compres	sor Type	2
Scroll		60 Hz
Rotary	AS LOW AS	

Traditional compressors just turn on and off, operating at 60 hertz when

running. But iQ Drive inverter technology has almost infinite modulation for a perfectly even variance. And it runs as low as 15 hertz, so it uses less power.

So while traditional compressors kick on at full speed to compensate for a small change in temperature, iQ Drive inverter technology alters the compressor speed just enough to match the slightest change in air temperature. In addition to minimal power utilization, you get a more consistent temperature level – and fewer hot and cold spots – at all times.

So Quiet, You May Forget You Have It

Thanks to its impressive efficiency, the Maytag iQ Drive®

Comfort System delivers the lowest sound levels in the industry. Today's traditional compressors operate at 3,600 rpm power. So even with full insulation, sound blanket, sound-absorbing base, lubricated motor and swept fan blade, they make enough noise to be heard inside the home. By comparison, the Maytag iQ Drive rotary compressor can ramp down to 900 rpm for ultra-low power operation and an ultra-low noise level. That makes for a quieter home, especially at night.

Making Your iQ Drive System Complete

Maytag iQ Drive System is designed to work with other Maytag accessories. Ask your dealer about whole-home humidifiers, air cleaners, HEPA systems and more. If allergens, dust, mold, pet odor, dry air, temperature control or other irritants are a problem for you or your family members, ask us how we can design a Maytag

MAYTAG

system to reduce common irritants and increase comfort throughout the home.

Maytag Delivers Dependability

For Total Home Comfort

- Maytag delivers more than just better indoor comfort. You should also feel comfortable about investing in a product that will perform when you need it most. Each Maytag air conditioner is quality-checked approximately 144 times during the manufacturing process, then run-tested to check operation performance. In the final analysis, computerautomated testing is performed to capture operation data for future reference should your dealer ever need it.
- The Maytag iQ Drive[®] System is built with proven components to provide safe, clean and reliable comfort year-round.
- The iQ Drive System meets the ENERGY STAR guidelines for efficiency performance. The bottom line to you is savings in your utility costs.

Unsurpassed in Warranty Protection

When a complete heating and cooling system is truly built to

exacting standards of quality and durability, the manufacturer's confidence shows in its warranty. The Maytag iQ Drive System is dependable for

the long haul, which is why it offers a 12-year Worry-Free Limited Warranty on all parts.

Maytag Dependability Promise

Every Maytag iQ Drive Comfort System features

AYTA

DEPENDABILITY

PROMISE

our Dependability Promise: In the first 12 years, if the compressor or heat exchanger fails in our iQ Drive System, we will replace the entire unit with an equivalent Maytag replacement. Ask your Maytag dealer or visit us at www.maytaghvac.com

Protective Durability

for warranty details.

A full metal jacket protects the coil from damage by weather and flying debris. These models feature brushed stainless steel cabinets and doors for superior quality and rust-free durability.

M1200 Air Conditioner/Heat Pump and Gas Furnace System with iQ Drive[®] Technology up to 23 SEER

Smart. Quiet. Reliable. Earth-friendly. Better, consistent home comfort. And the lowest energy bills possible. It could be the smartest system

we've ever made.

This system is part of our ecoLogic[™] family, the most energy efficient, environmentally friendly products we offer.

Top-of-the-Industry Installation and Service

When choosing your heating and cooling system, look not only at the products, but also at the service and support provided by the dealer. Maytag dealers receive extensive training in the installation and care of your equipment. That means your Maytag dealer can help you select the right system for your home and keep it in top operating condition.

For more information, contact us, your Maytag dealer:

For ultimate comfort, consider

iQ Zone™ works hand-in-hand with your iQ Drive® system to create separate comfort zones in your home. Now you can easily have the bedrooms cooler than the kitchen, or the rarely used den a different temperature than the family room. It's your home. Customize it to your comfort.

iQ Zone offers these benefits.

- Independent temperature control in up to 8 zones served by one unit.
- Superior comfort.
- Elegant touch-panel control.
- May increase energy savings.
- Easy to use.

Ask your Maytag dealer for details on iQ Zone or visit www.maytaghvac.com.

*Environmentally Friendly - Smart Cool 410[™]

Smart Cool

This product uses environmentally friendly refrigerant.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit www.energystar.gov.
