2011 FEDERAL TAX CREDITS

WHAT YOU SHOULD KNOW.

FEDERAL TAX CREDIT OVERVIEW.

Signed into law in December 2010, the federal tax credit rewards homeowners who make high-efficiency improvements to their home, including replacement heating and cooling systems. The program allows homeowners to take up to a $500 total credit on their taxes during 2011. The credit is limited by 10 percent of installed costs.

Here are the details:

- Qualifying product must be placed in service between January 1, 2011, and December 31, 2011.

- Qualifying product must be for taxpayer's principal residence.

- $500 is the maximum total amount that can be claimed for all products placed in service in 2011.

- Qualifying product must have a Manufacturer Certification Statement, a signed statement from the manufacturer certifying that the product or component qualifies for the tax credit. Maytag provides these Certifications on www.maytaghvac.com. Taxpayers must keep a copy of the certification statement for their records, but do not have to submit a copy with their tax return.

- Homeowners should save their receipts.

MAYTAG

FEDERAL TAX CREDIT
heating and cooling qualifications.

Below are the minimum requirements for heating and cooling system qualification:
