

M1200 Series Limited Warranty Dependability Promise

WHAT'S INSIDE MATTERS™

Warranty effective for equipment manufactured after January 1, 2013

Dear Customer,

Congratulations on your decision to purchase the most reliable heating and cooling equipment. We are so confident in our product performance that we back it with the **Maytag** Dependability Promise:

*If the **Compressor** in your **Maytag** outdoor cooling/heat pump unit fails to operate during the first twelve years of ownership, under normal use and due to a defect in materials or workmanship, **NORDYNE** will replace the entire outdoor unit. A labor fee up to \$250 will be paid to the service company to replace the failed piece of above listed equipment. You are responsible for the balance of all labor charges.

If the **Heat Exchanger** in your **Maytag** package gas/electric unit or furnace fails to operate during the first twelve years of ownership, under normal use and due to a defect in materials or workmanship, **NORDYNE** will replace the package gas/electric unit or furnace. A labor fee up to \$250 will be paid to the service company to replace the failed piece of above listed equipment. You are responsible for the balance of all labor charges.

Exclusions:

This Dependability Promise limited warranty must be registered within 60 days of the installation or occupancy. If registration is not completed within 60 days, the dependability promise reverts to 1 year.

If it is a split system unit, it must be installed at the same time as a **Maytag** manufactured and matched coil or air handler. The warranty period for the new unit continues from the original installation date of the previous unit.

The residence must be an owner-occupied single family dwelling (apartment complexes are not covered under the Dependability Promise.)

*Note: In the year 2010, air conditioning equipment will no longer be available with R-22 refrigerant. At that time an outdoor condensing unit replacement will require a system that is compatible with R-410A, the new refrigerant. The indoor evaporator coil and connecting line set will have to be replaced. The homeowner will be responsible for the expense of replacing the evaporator coil and line set. In lieu of replacing the evaporator coil and line set, the homeowner can elect to receive a new R-22 replacement compressor if available.
