

UVFC-600 shown with Superior VFGL 24-4 Vent-Free gas log set

Don't be fooled by appearances. Superior® Vent-Free Universal Fireboxes look like beautiful, cozy fireplaces, but they are actually energy-efficient firebox enclosures for Vent-Free Gas Log heaters. Designed for use with Lennox Hearth Products or other listed Vent-Free Gas Log Sets, Fireboxes work in conjunction with the Log Sets to deliver 99% fuel burning efficiency. Together, they heat a room for just pennies a day.

Designed for installation ease, Universal Vent-Free Fireboxes require no venting and utilize a standard gas flex connector. Without chimneys or venting to contend with, Universal Vent-Free Fireboxes can be installed practically anywhere – under bookcases, windows, even on the 25th floor.

Choose from radiant or heat-circulating models with 36" or 41" screen openings. Radiant models allow facing materials to be installed flush with the front opening. Heat-circulating designs feature louvers and space for installing an optional forced air blower for increased warm air circulation. Hoods are included to protect mantels and other combustible surrounds. Large brick liners create a genuine masonry look. All models are Warnock Hersey listed as ventless firebox enclosures for decorative unvented room heaters.

Innovative Features

- Use fireboxes with ANSI Z21.11.2 vent-free log sets
- Easy gas line access with knockouts on both sides
- Realistic brick interior liner

Distinctive Advantages

- No vent means installation almost anywhere
- Radiant or heat-circulating models
- Hood included protects mantel
- Fully assembled, ready to install

Realistic brick interior liner.
